

FORM TESTING QC CHECKLIST

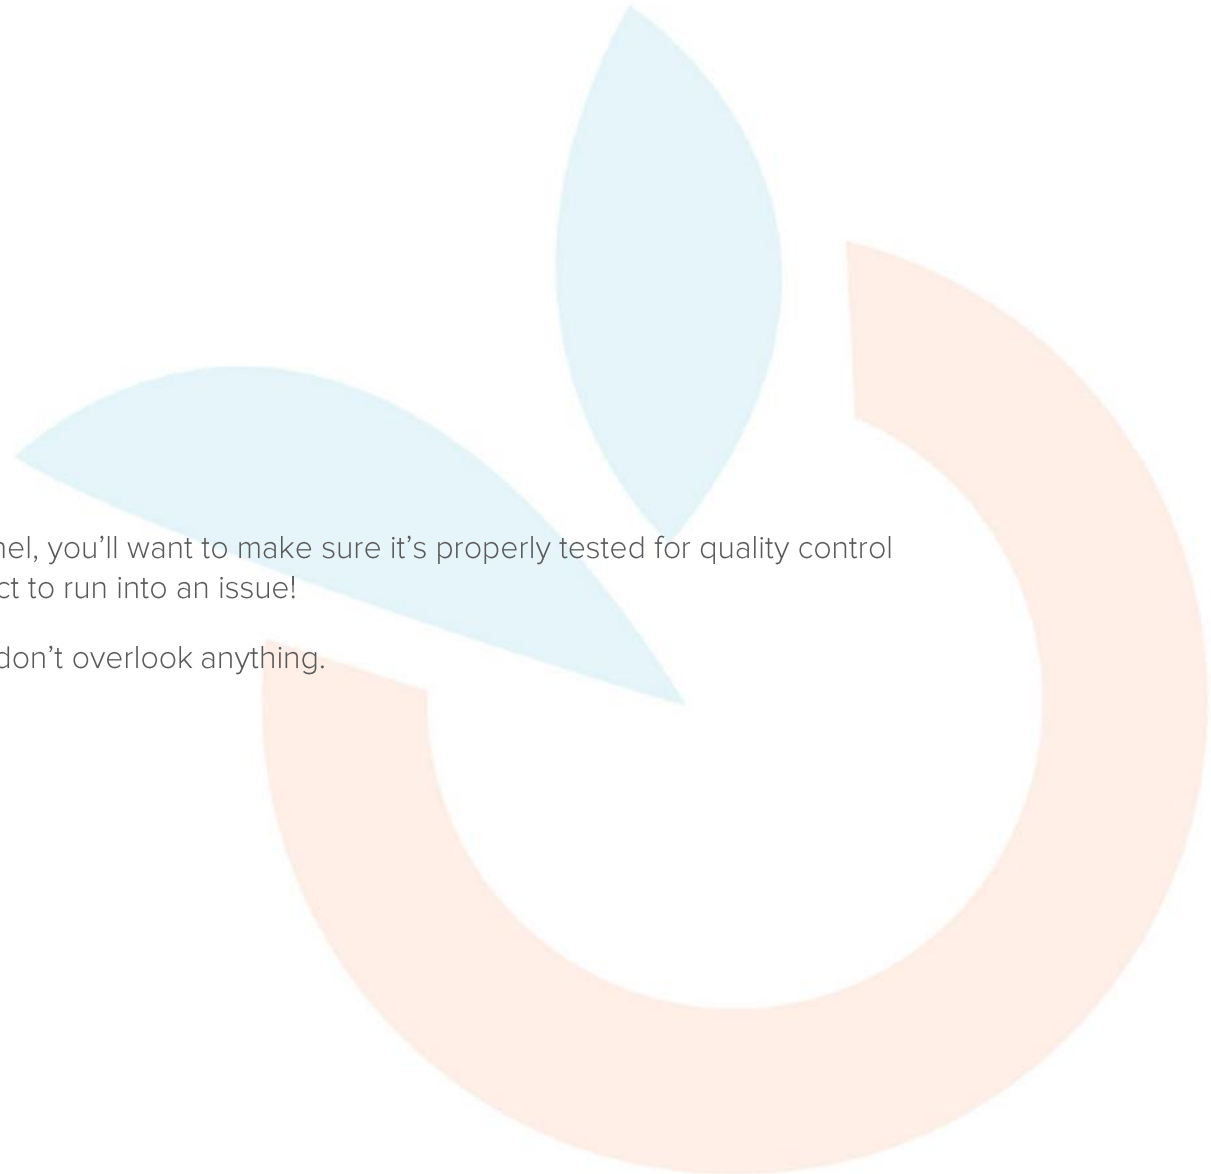

INTRODUCTION

When you add a new form to your website or funnel, you'll want to make sure it's properly tested for quality control purposes. The last thing you want is a hot prospect to run into an issue!

This blueprint provides a simple checklist so you don't overlook anything.

Sharon Hayes

1. TEST FORM WITH TEST INFO

ITEM TO CHECK	DONE?
Check for thank you email	
Confirm you reach thank you page	
If any information is supposed to be passed through to thank you page, make sure it shows	
Check for any tags/lists you're supposed to be added to	
Check for any integration that's supposed to happen, i.e. creation of account in Wishlist Member	

2. TEST FORM WITH INCOMPLETE INFO

ITEM TO CHECK	DONE?
Make sure it doesn't submit and check error page/message	
Is CSS proper on error message or page?	
Are there any required fields that you can submit the form without including? (if so, fix)
